Fear, Uncertainty and Doubt (FUD) is a common reaction in life, businesses and investments, a reaction with mixed of feelings where a person can't decide rationally, and the way of judgment on a certain action is based on FUD. However, we truly believe that this reaction is healthy, natural, and right. Otherwise, projects milestones can't reached.

In the cryptocurrency market, FUD is being misunderstood, investors who ask questions, enquire, follow-up on roadmaps, or give their opinion are being banned from their own communities, bullied, or blocked.

The aim here is to adopt the mindset that FUDDERS can drive better diffusion of memecoins within the cryptocurrency market, hence in return increasing cryptocurrency market adoption simultaneously. Our project is based on negative marketing and a research-based, merely bringing fake positivity to the end, and effective negativity to the forefront.

The FUD Coin smart contract applies

Although there are growth fees detailed as follow:

Marketing and Listing (Helps spread our negativity forever)

Served back in the liquidity pool to back up the volatility and leads to higher price floor.

What FUD Coin aims to accomplish?

The goal is to increase cryptocurrency market adoption, by embracing FUD, explain it and highlight the misinterpretation of FUD, this will be done through achieving multiple goals in; Market Capitalization, listing in data aggregators, and exchanges.

By achieving those goals, the FUD Index project is established, which will be a database to highlight the FUD's questions for cryptocurrencies project without judgments, bans, or blocks. FUDCoin is not your average memecoin but a big vision.

Prior to launch %75 of the total supply was sent to the black hole address, permanently reducing the supply.

A burn of %10 from the total supply is sent to the above address following the launch in five days.

Total burn is: %85 of the total supply.

The LP token is burnt to ensure that FUD Coin is un-ruggable.

We take the safety of holder's tokens extremely seriously, therefore we have taken the following measures to protect the FUD Coin Community

Initial LP Token Burnt > Deployer is FUD Index Wallet > Less Supply and high burn percentage to avoid Whales > Fair Launch > No Minting Function
Such measures makes FUDCoin the safest in existence.

The team are PhD students specialised in Engineering and Finance.
